The Examiner is hereby withdrawn the Election/Restriction Requirement mailed on 6/23/2008 in favor of the instant Election/Restriction Requirement due to the telephone called from Mr. Hughet (Reg. 44481) on 7/29/2008 because the Examiner failed to provide claims which are directed to each species in a 371 application.

Election/Restriction

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Group I: the species of a blister pack as shown in Figures 1-4.

Group II: the species of a blister pack as shown in Figures 5-8.

Group III: the species of a blister pack as shown in Figures 14-17.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the

Art Unit: 3728

limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

2. The claims are deemed to correspond to the species listed above in the following manner:

The species of Figures 1-4: 1-8, 13-16, 29-32

The species of Figures 5-8: 1-3, 9-16, 29-32.

The species of Figures 14-17: 1, 2, 17-32.

The following claim(s) are generic: 1 and 29.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: the technical relationship that is common among species for example a blister pack comprising a tray formed with a plurality of trough formations in parallel, side-by-side relationship with adjacent trough formations being spaced apart from one another by planar lands to which a peelable or rupturable backing film is laminated so as to define a plurality of individually sealed compartments is not a special technical feature since such blister pack in claim 1 or 29 does not avoid the prior art, such as The German Patent No. DE8407868.
